
Freezer cleaner – low temperature cleaning agent

TK 30 is the clean solution for all washable surfaces in freezer rooms

- ◆ high cleaning power, even in case of heavy soiling,
- ◆ the de-icing effect allows a cleaning without defrosting,
- ◆ saves time, costs for electricity and time-consuming rearrangements.

TK 30 stands for gentle power with high protection of materials

- ◆ suited for all tiles, flagstones, synthetics and metals,
- ◆ free of aggressive substances, economically in use,
- ◆ applicable at temperatures down to – 30°C.

Characterisation:

Appearance:	Colourless liquid with a mild scent.
Ingredients:	Preparation from native tensides, water soluble solvents and auxiliaries in water. Free of AOX and phosphate.
Classification:	Not harmful.

All ingredients are biologically degradable.

Areas of application and recommended dilution:

Undiluted	Apply the product directly to floors or walls. Remove all unpacked foods from area before cleaning. Allow to soak for 10 – 20 minutes, depending on the amount of soiling and ice present. Heavily soiling or thick ice deposits may require longer soaking for complete removal. If required, use a cleaning-sponge. Remove loosened soiling with a squeegee, wipe and dry the area with a clean cloth, if necessary. A wet vacuum cleaner may be used.
